

AQUATICA™

Digital

February 8, 2019

Last week in Bonaire we did some final testing on our new 5HD monitor, this monitor will be part of an extensive monitor/recorder series.

Monitor specifications:

- ✓ Full HD 1920x1080 Display Resolution
- ✓ 460 cd/m² Brightness
- ✓ 1400:1 Contrast Ratio
- ✓ 5.7" IPS LED-Backlit Display
- ✓ Accepts 4K HDMI Input
- ✓ Peaking focus assist
- ✓ False colors tool
- ✓ Safe area (80/85/90/93/96%, 2.35:1)
- ✓ Image flip (H, V, H/V)
- ✓ Color temperature adjustment

"Normally I would stay away from any type of monitor system, so far only viewfinders have given me accurate readings in color, sharpness and depth of field until I encountered the Aquatica 5HD monitor.

The 5HD monitor beside it to be perfectly neutral balanced, it gave me a clear and accurate reading of the image and all the info I needed to satisfy my expectations in color balance, sharpness and depth of field.

Without a doubt this needs to be part of my equipment."
